PROFESSIONAL PROFILE

Web developer with strong backend development skills and database management expertise.

EXPERIENCE

Universidad Cenfotec, San José: *Web Developer*

I have experience in creating web applications using HTML, CSS, JavaScript, Java, and frameworks like Spring and Bootstrap. I use Git to manage code and automate development tasks, and I develop RESTful APIs using Node.js and Express. I have participated in the implementation of agile methodologies in projects, facilitating daily scrum meetings and retrospectives to improve the workflow, as well as in sprint planning, user story estimation, and progress tracking.

Additionally, I have experience in database analysis and design, SQL query optimization, stored procedures and functions development, data model design and implementation, collaboration on data integration projects, participation in database documentation creation, and the implementation of security systems in web applications.

I have developed responsive web pages using HTML, CSS, and JavaScript. I participated in project planning and follow-up meetings to ensure on-time delivery. I maintained up-to-date technical documentation for projects to facilitate collaboration with other team members.

EDUCATION
